Subject: RE: Change Scope for USCG

Duc,

Thank you for the reminder ... because we really need to have this revision happen. The discussion is below just so you have the background. I don't know what the Scope of Work already says but here is what I would propose adding: "USCG Strike Team members shall perform as field observers and Safety Officers in the daily performance of their site duties at the Gold King Mine." Or something like that. Call me if you want to discuss. BTW: this is for the mine site IAG only and not the Durango Incident Command Post IAG. Thank you, lw

Background:

Thanks for showing me around the mine site yesterday and discussing how we can fine tune the field safety program. We are working on getting you an EPA person for the Command Post as we discussed, in order to free up all of the USCG Strike Team members to be your field Observers and Safety Officers. The Safety function will need to be added to their task order. I talked with Lou Von Oldenberg, ER SSO, and recommended adding several Construction Area signs to the site to reduce the vehicle traffic from non-site workers around work areas as we discussed. Another option to consider would be to have them station a flagger near the intersection of the mine access roads and the county road to help direct construction vehicle movement and keep local traffic away from site activities. This is a standard practice on many of our sites where heavy equipment is operating and small vehicle traffic continues around the site. Let me know if you have any questions. I'm here to support you and help keep everyone safe. I will stop up periodically as needed.

Subject: Change Scope for USCG

Hi Laura,

You mentioned about the USCG WAF that needs to be amended for the Scope of Work.
Because of the bad phone reception so I did not get all information provided.

Please let me know in detail. Thanks
